You do not have to open up the email browser every time. It sends out notifications whenever you receive emails. You will experience convenience!

APP OF THE WEEK

ZOTERO

Are you struggling with managing too many web sources during your research progress?

Recommend to students who need need...

- **Annotating** and **Organizing**

(Create notes and tags)

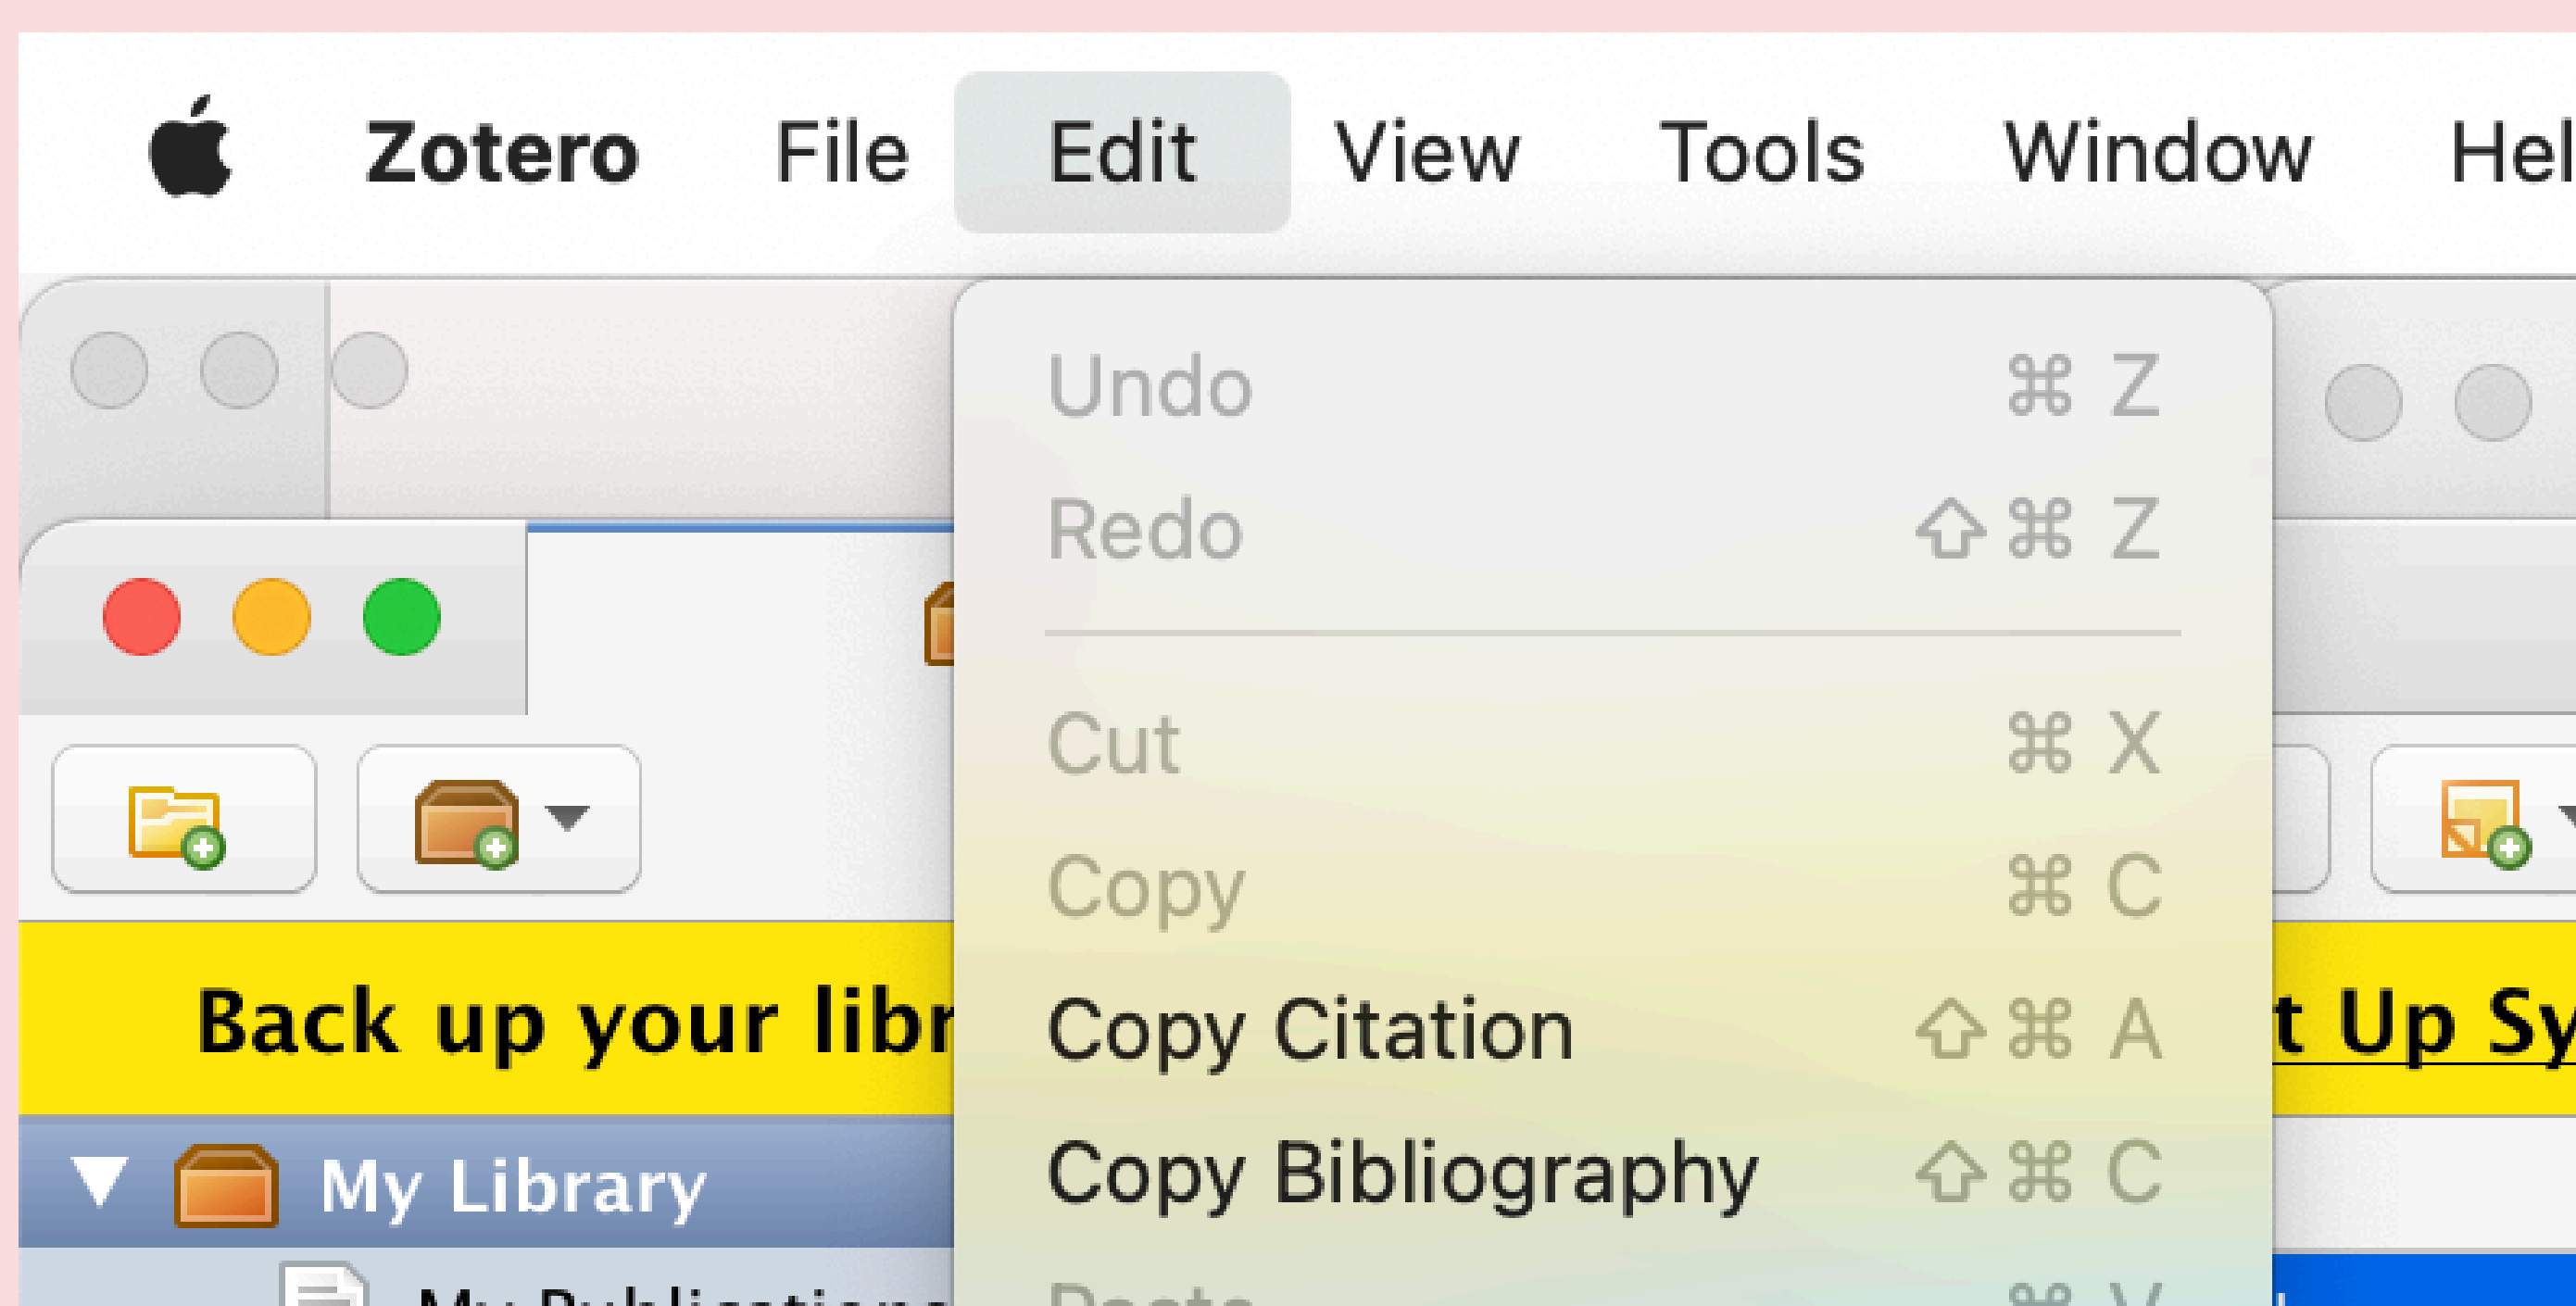

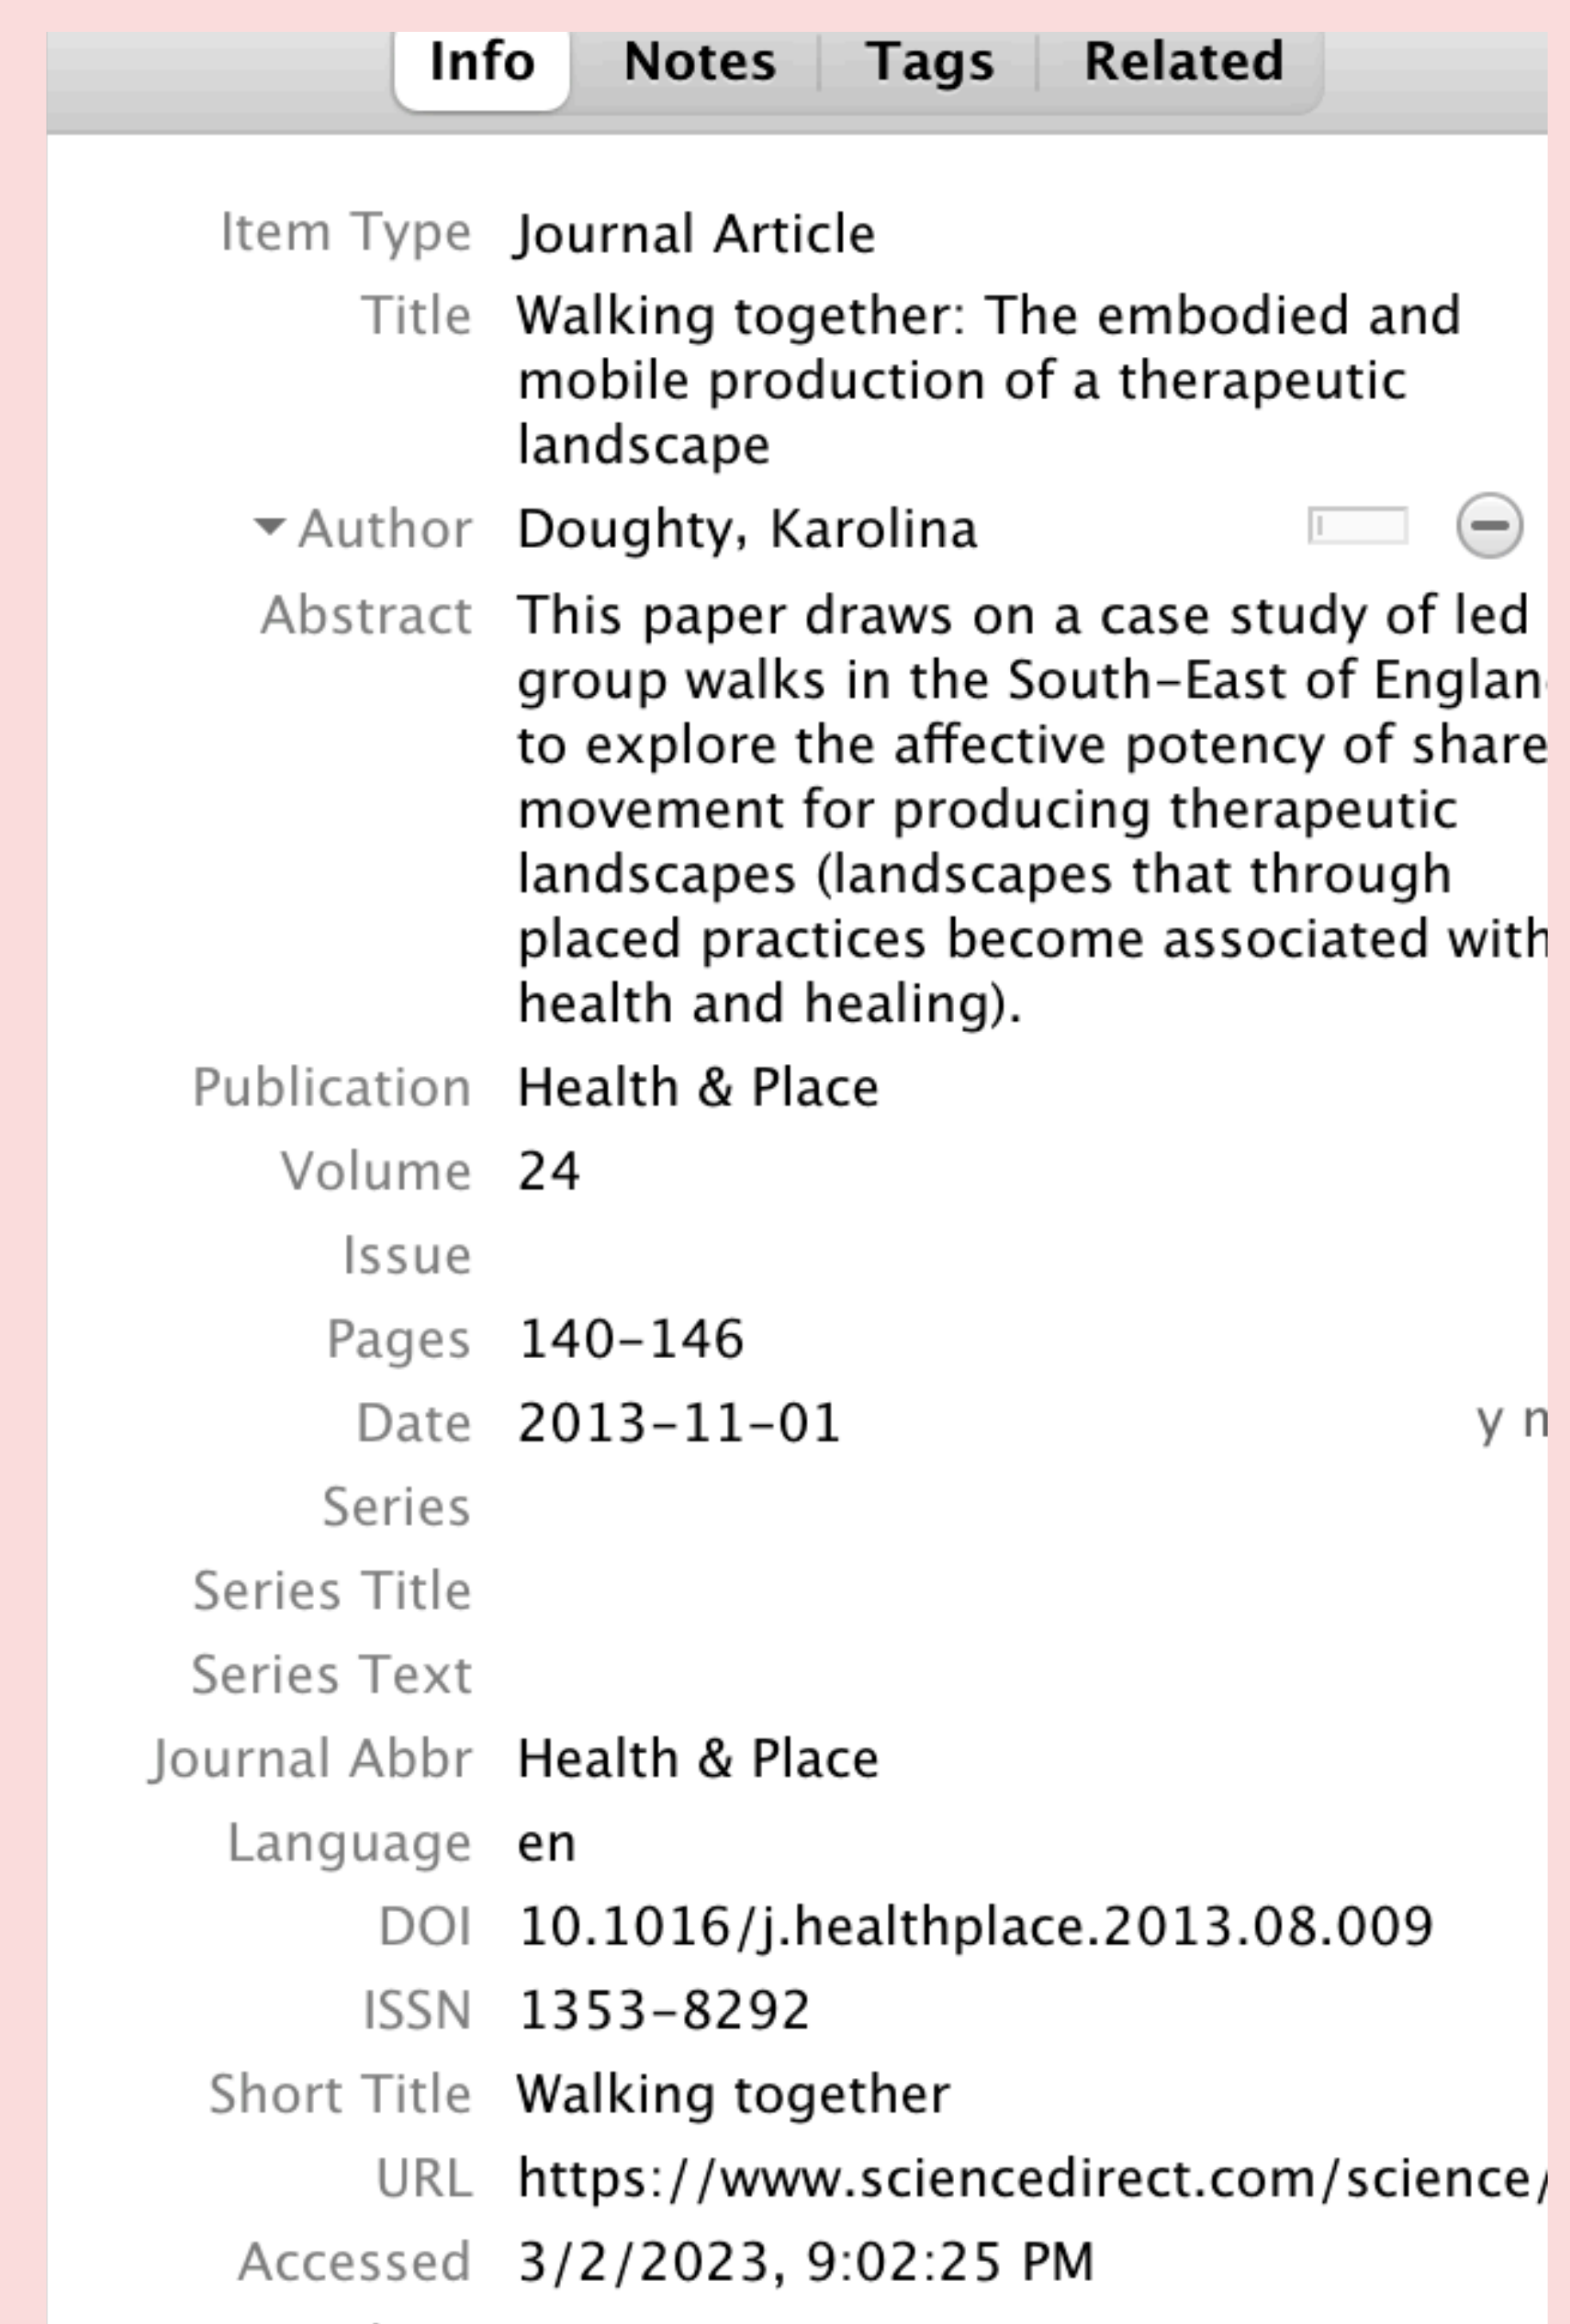

- **Reference Management**

(Citing bibliography)

→ *automatically includes the basic information required for citation*

- **Collaboration on Research Project**

→ *you can copy either a single citation or an entire bibliography*

Why use Zotero?

For each research project, it allows us to organize the resources various types of that we used in the desktop.

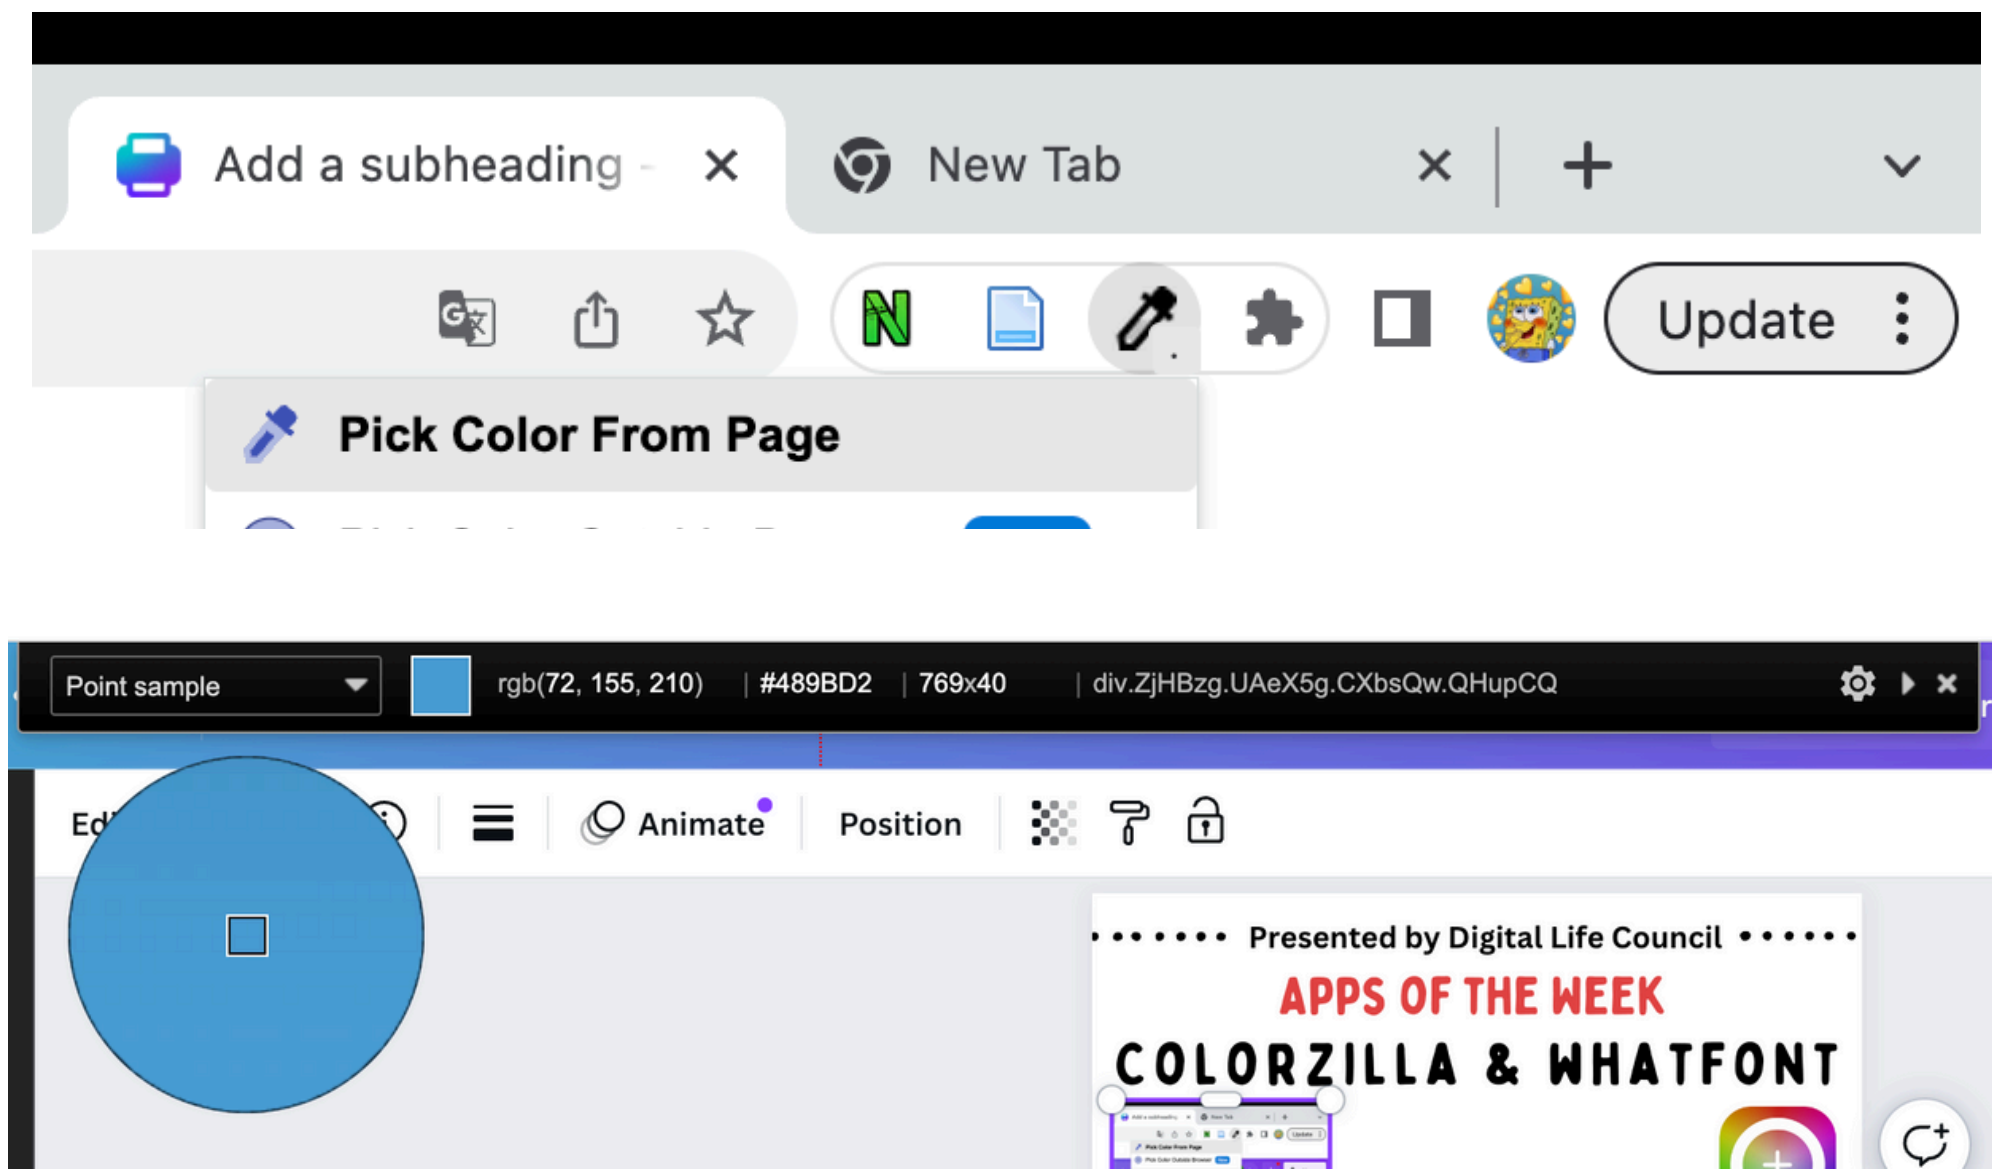

Go to this website to download the application!

<https://www.zotero.org/download/>

APPS OF THE WEEK

COLORZILLA & WHATFONT

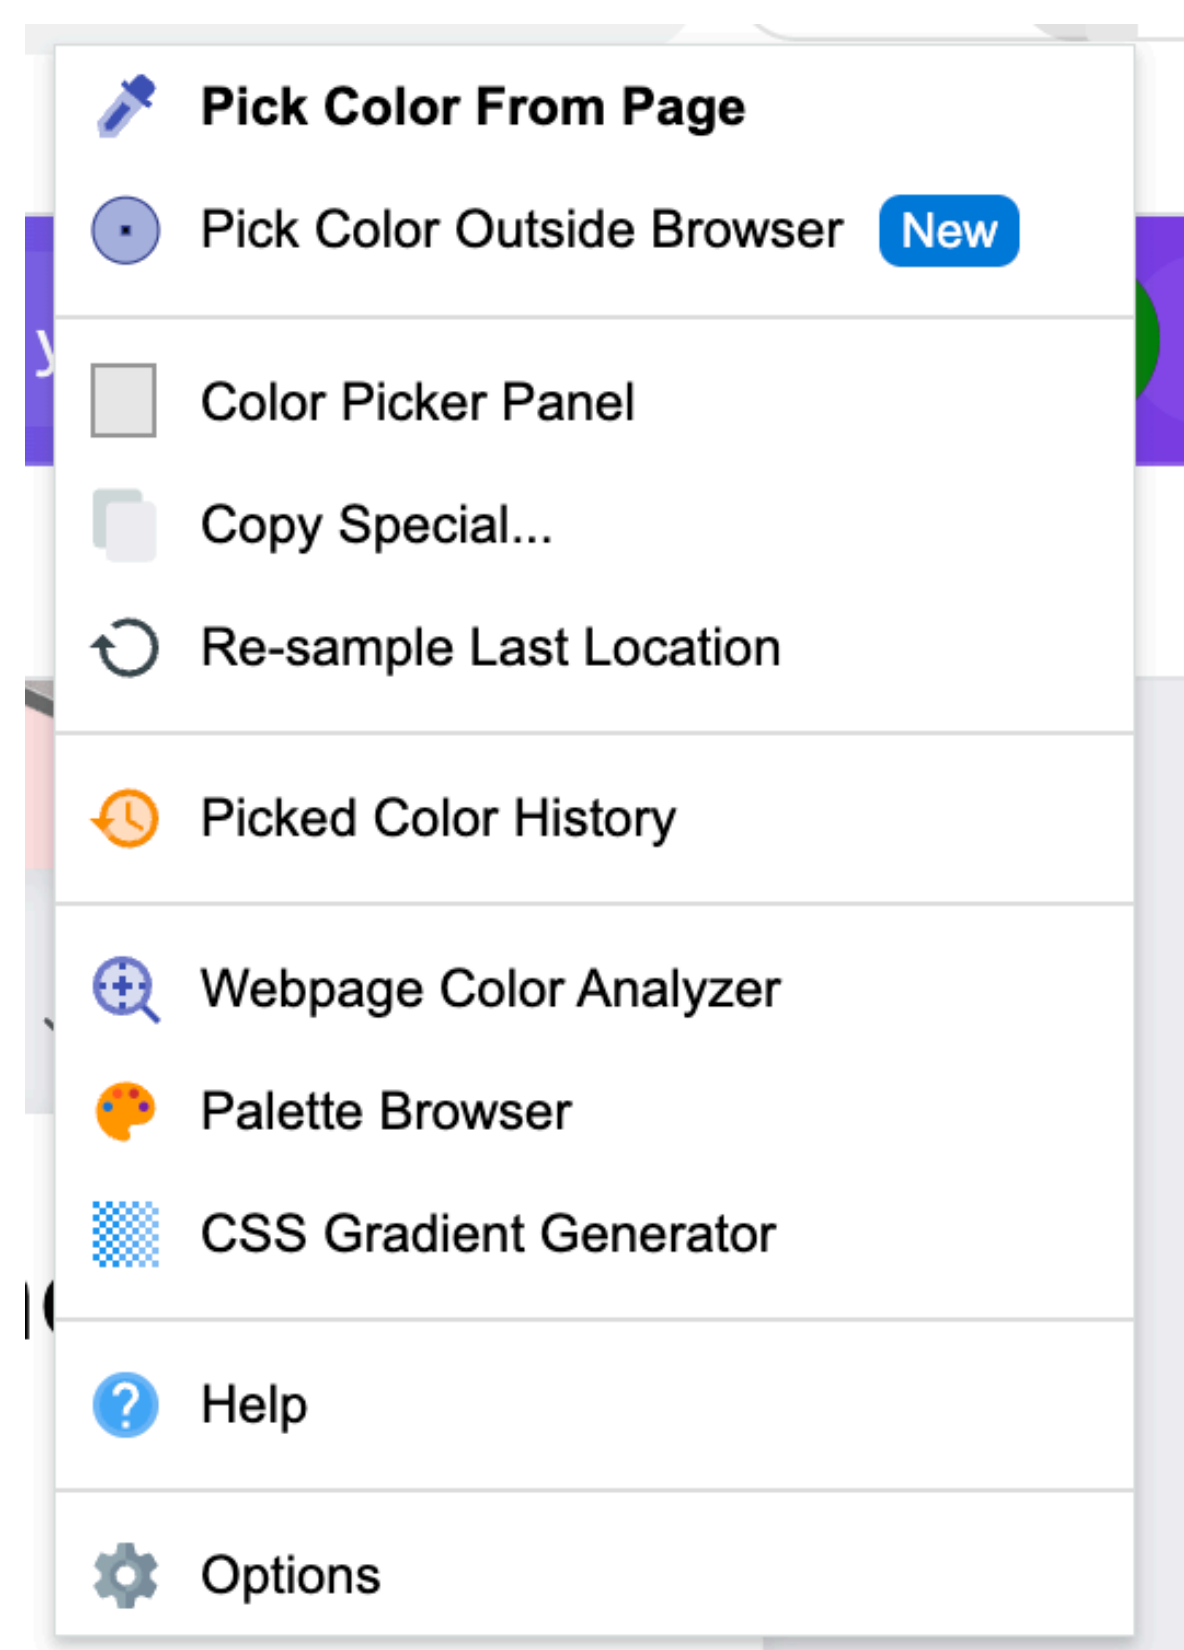

How to use it

1. open the extension and press "Pick Color From Page"
2. Put your cursor on the item you want to know about the color. It will give RGB value and hex value for that color!

Recommend to students who...

1. do lots of graphic design
2. are curious about the color of the website
3. do not want to open a fancy application to just extract the color of the image.

More Useful Tips!

1. In the "Color Picker Panel", you can have a **color picker window**.
2. In "Picked Color History", you can see your **color history**.
3. In "Webpage Color Analyzer", you can see **all the colors used in the website**.

Extensions

Full access

These extensions can see and change information on this site.

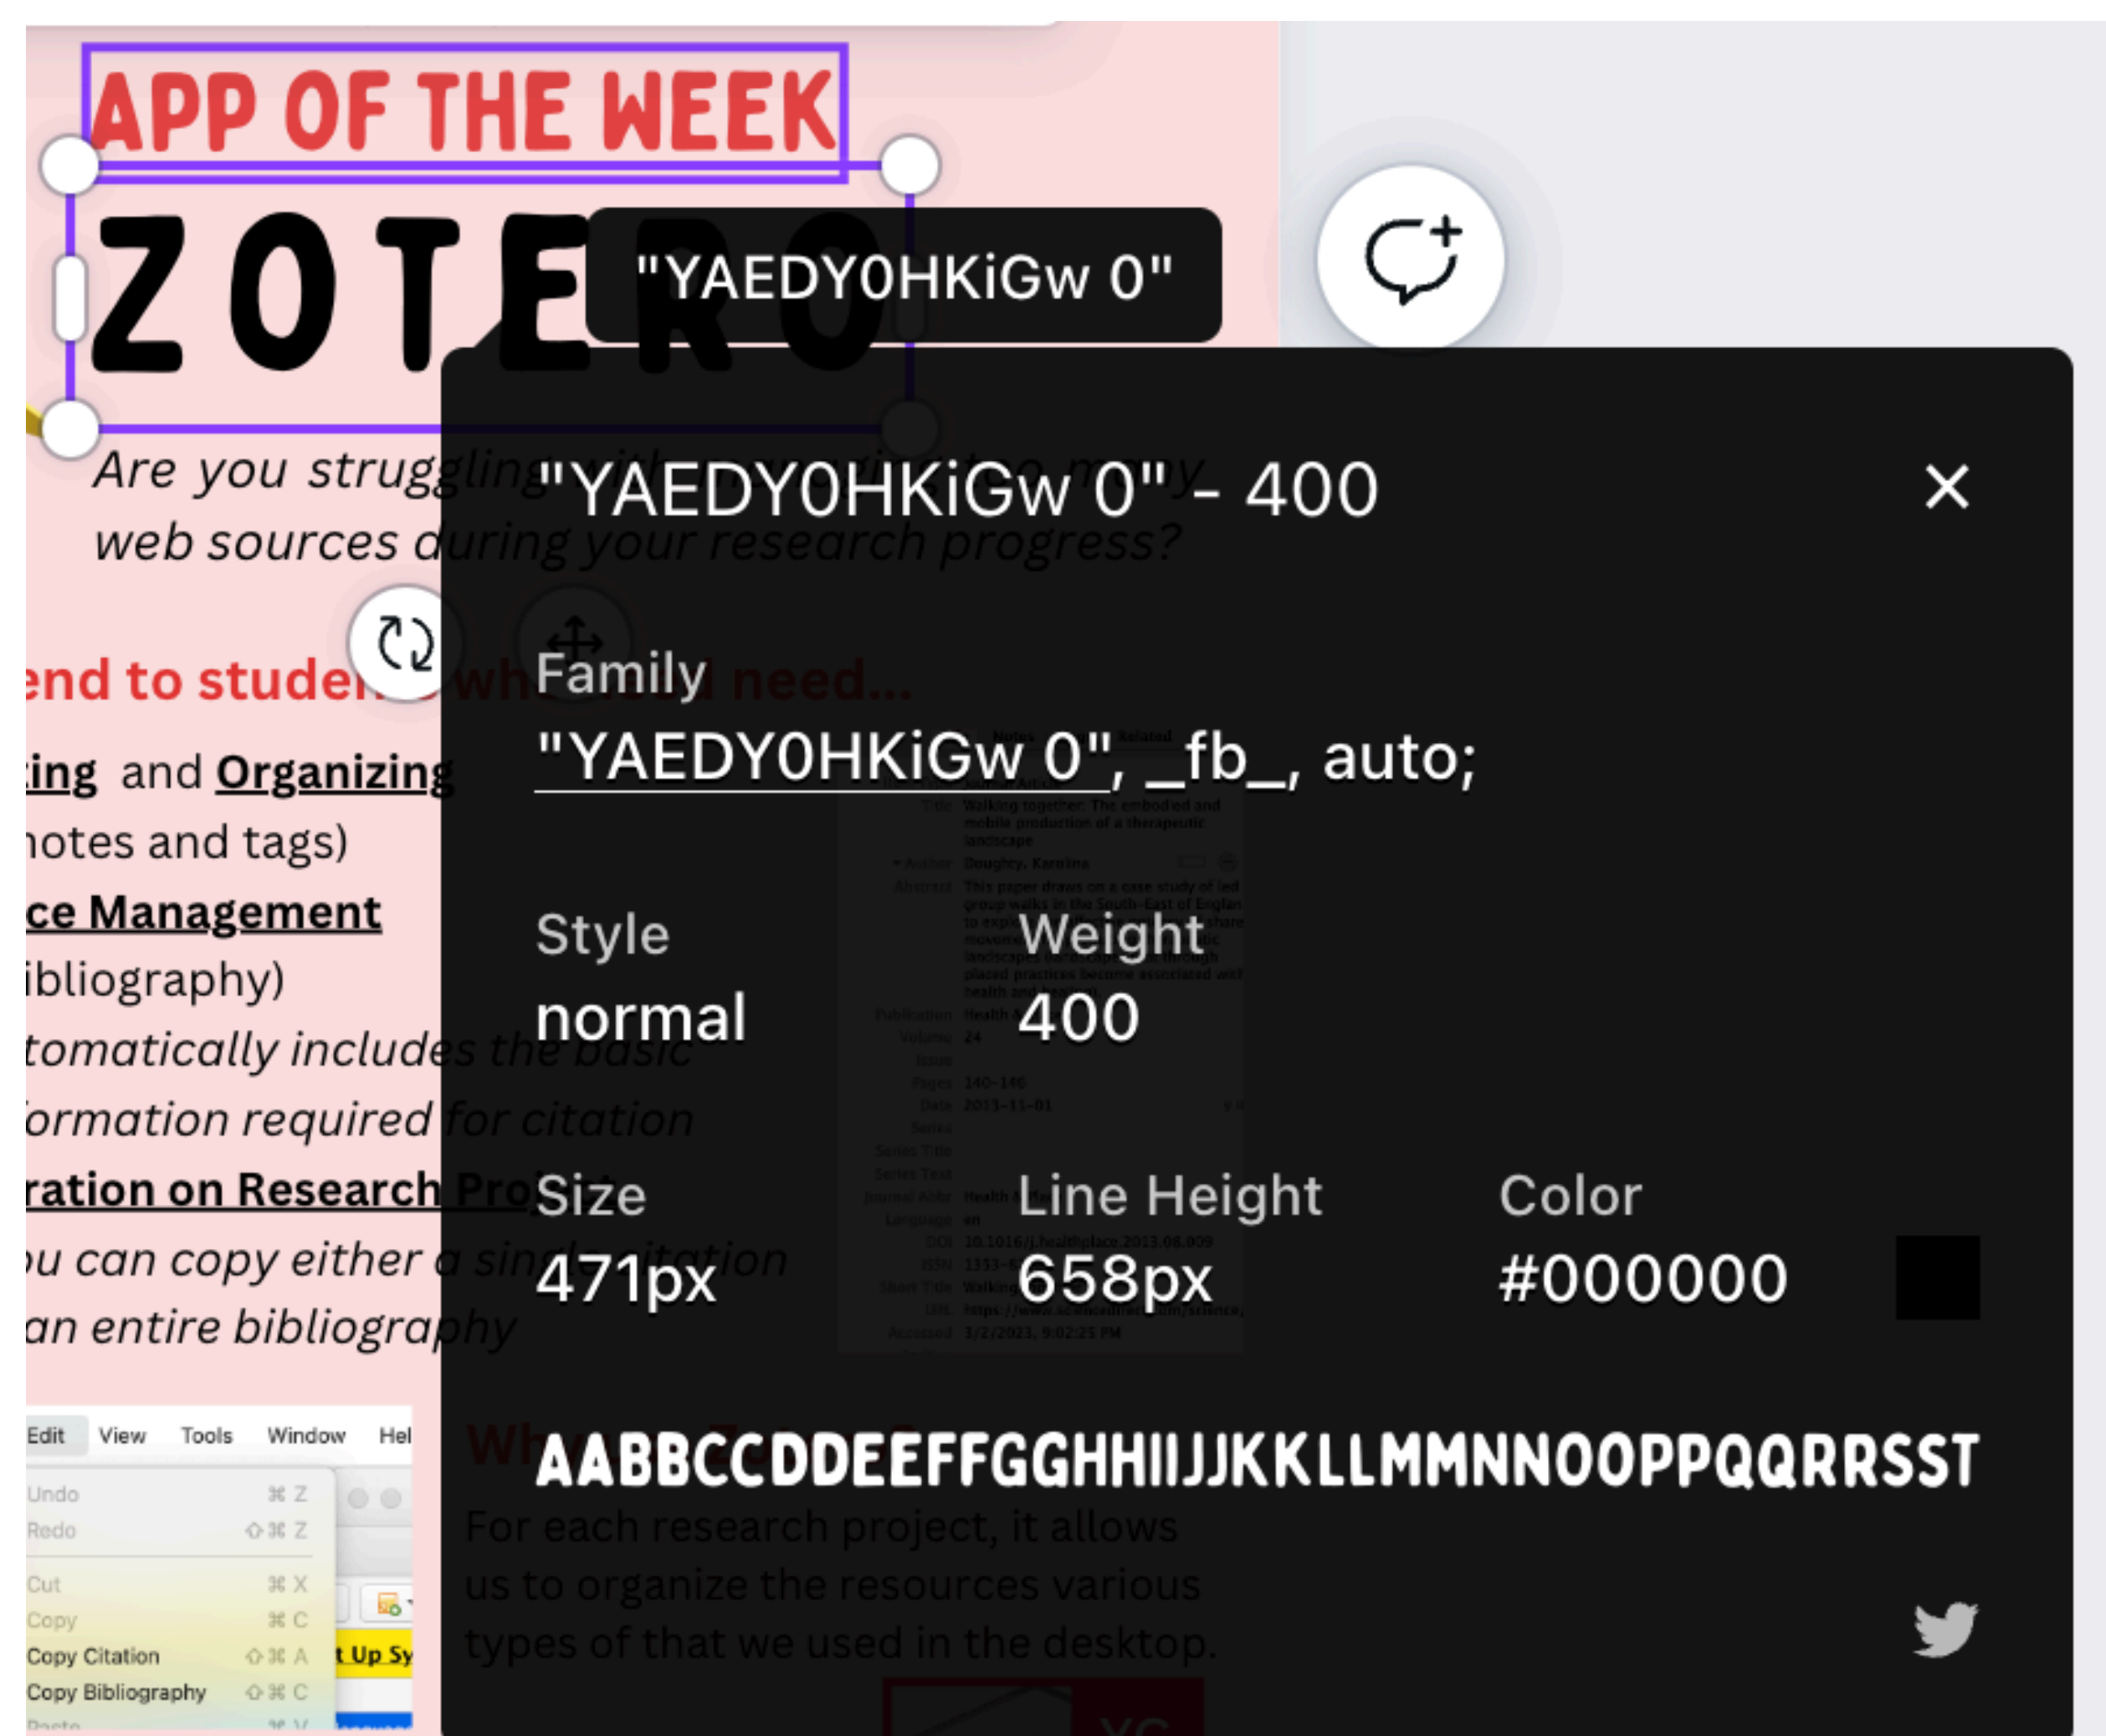

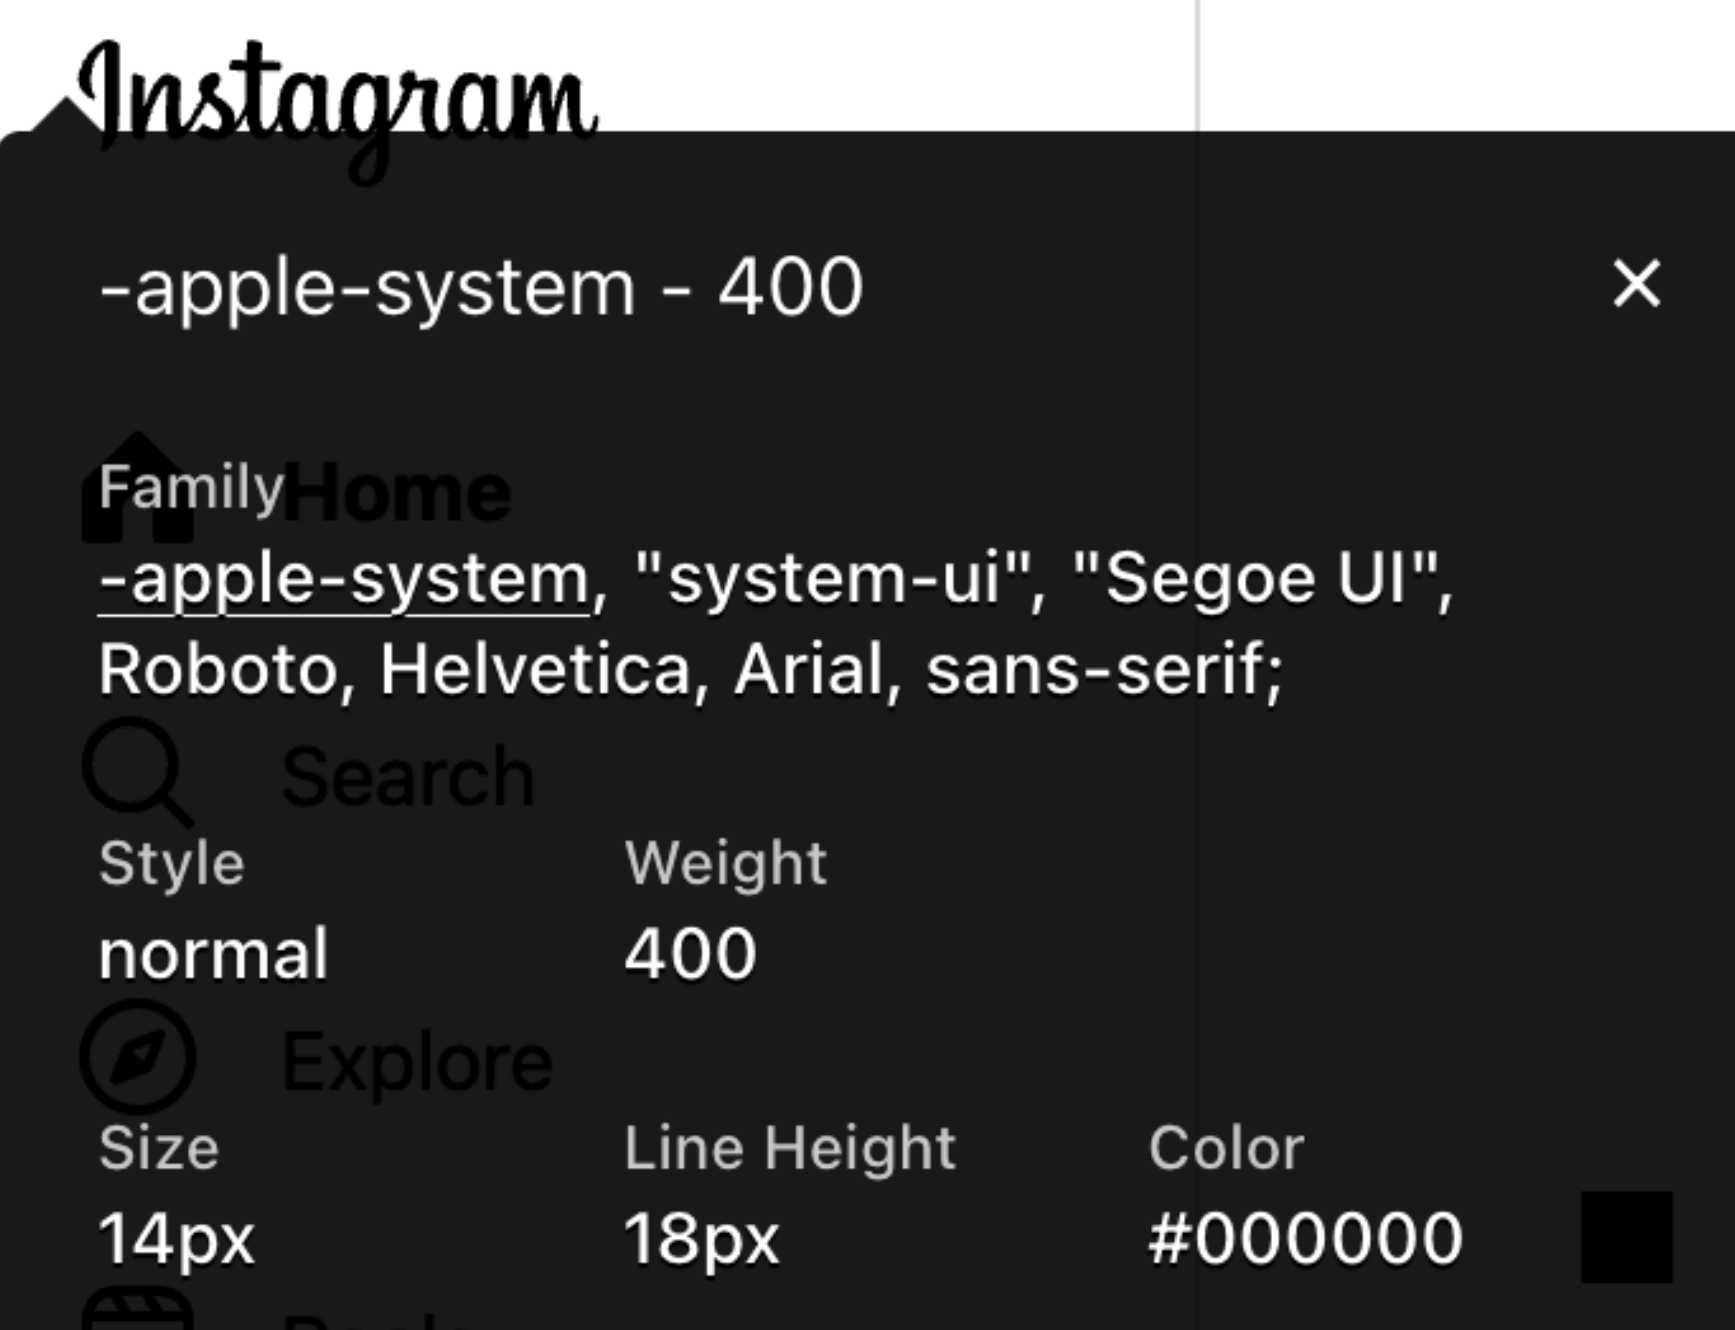

- Checker Plus for Gmail™
- ClassLink OneClick Extension
- Floating Player - Picture in...
- Grammarly: Grammar Chec...
- f? WhatFont**

How to use it

1. Open the extension and press "WhatFont"
2. Put your cursor on the text that you want to know the type of the font
3. WhatFont will **provide you with a font, size, and color of the text** if you click what you want to know

WhatFont is a Chrome Extension that can be used to **see what kinds of fonts are used**

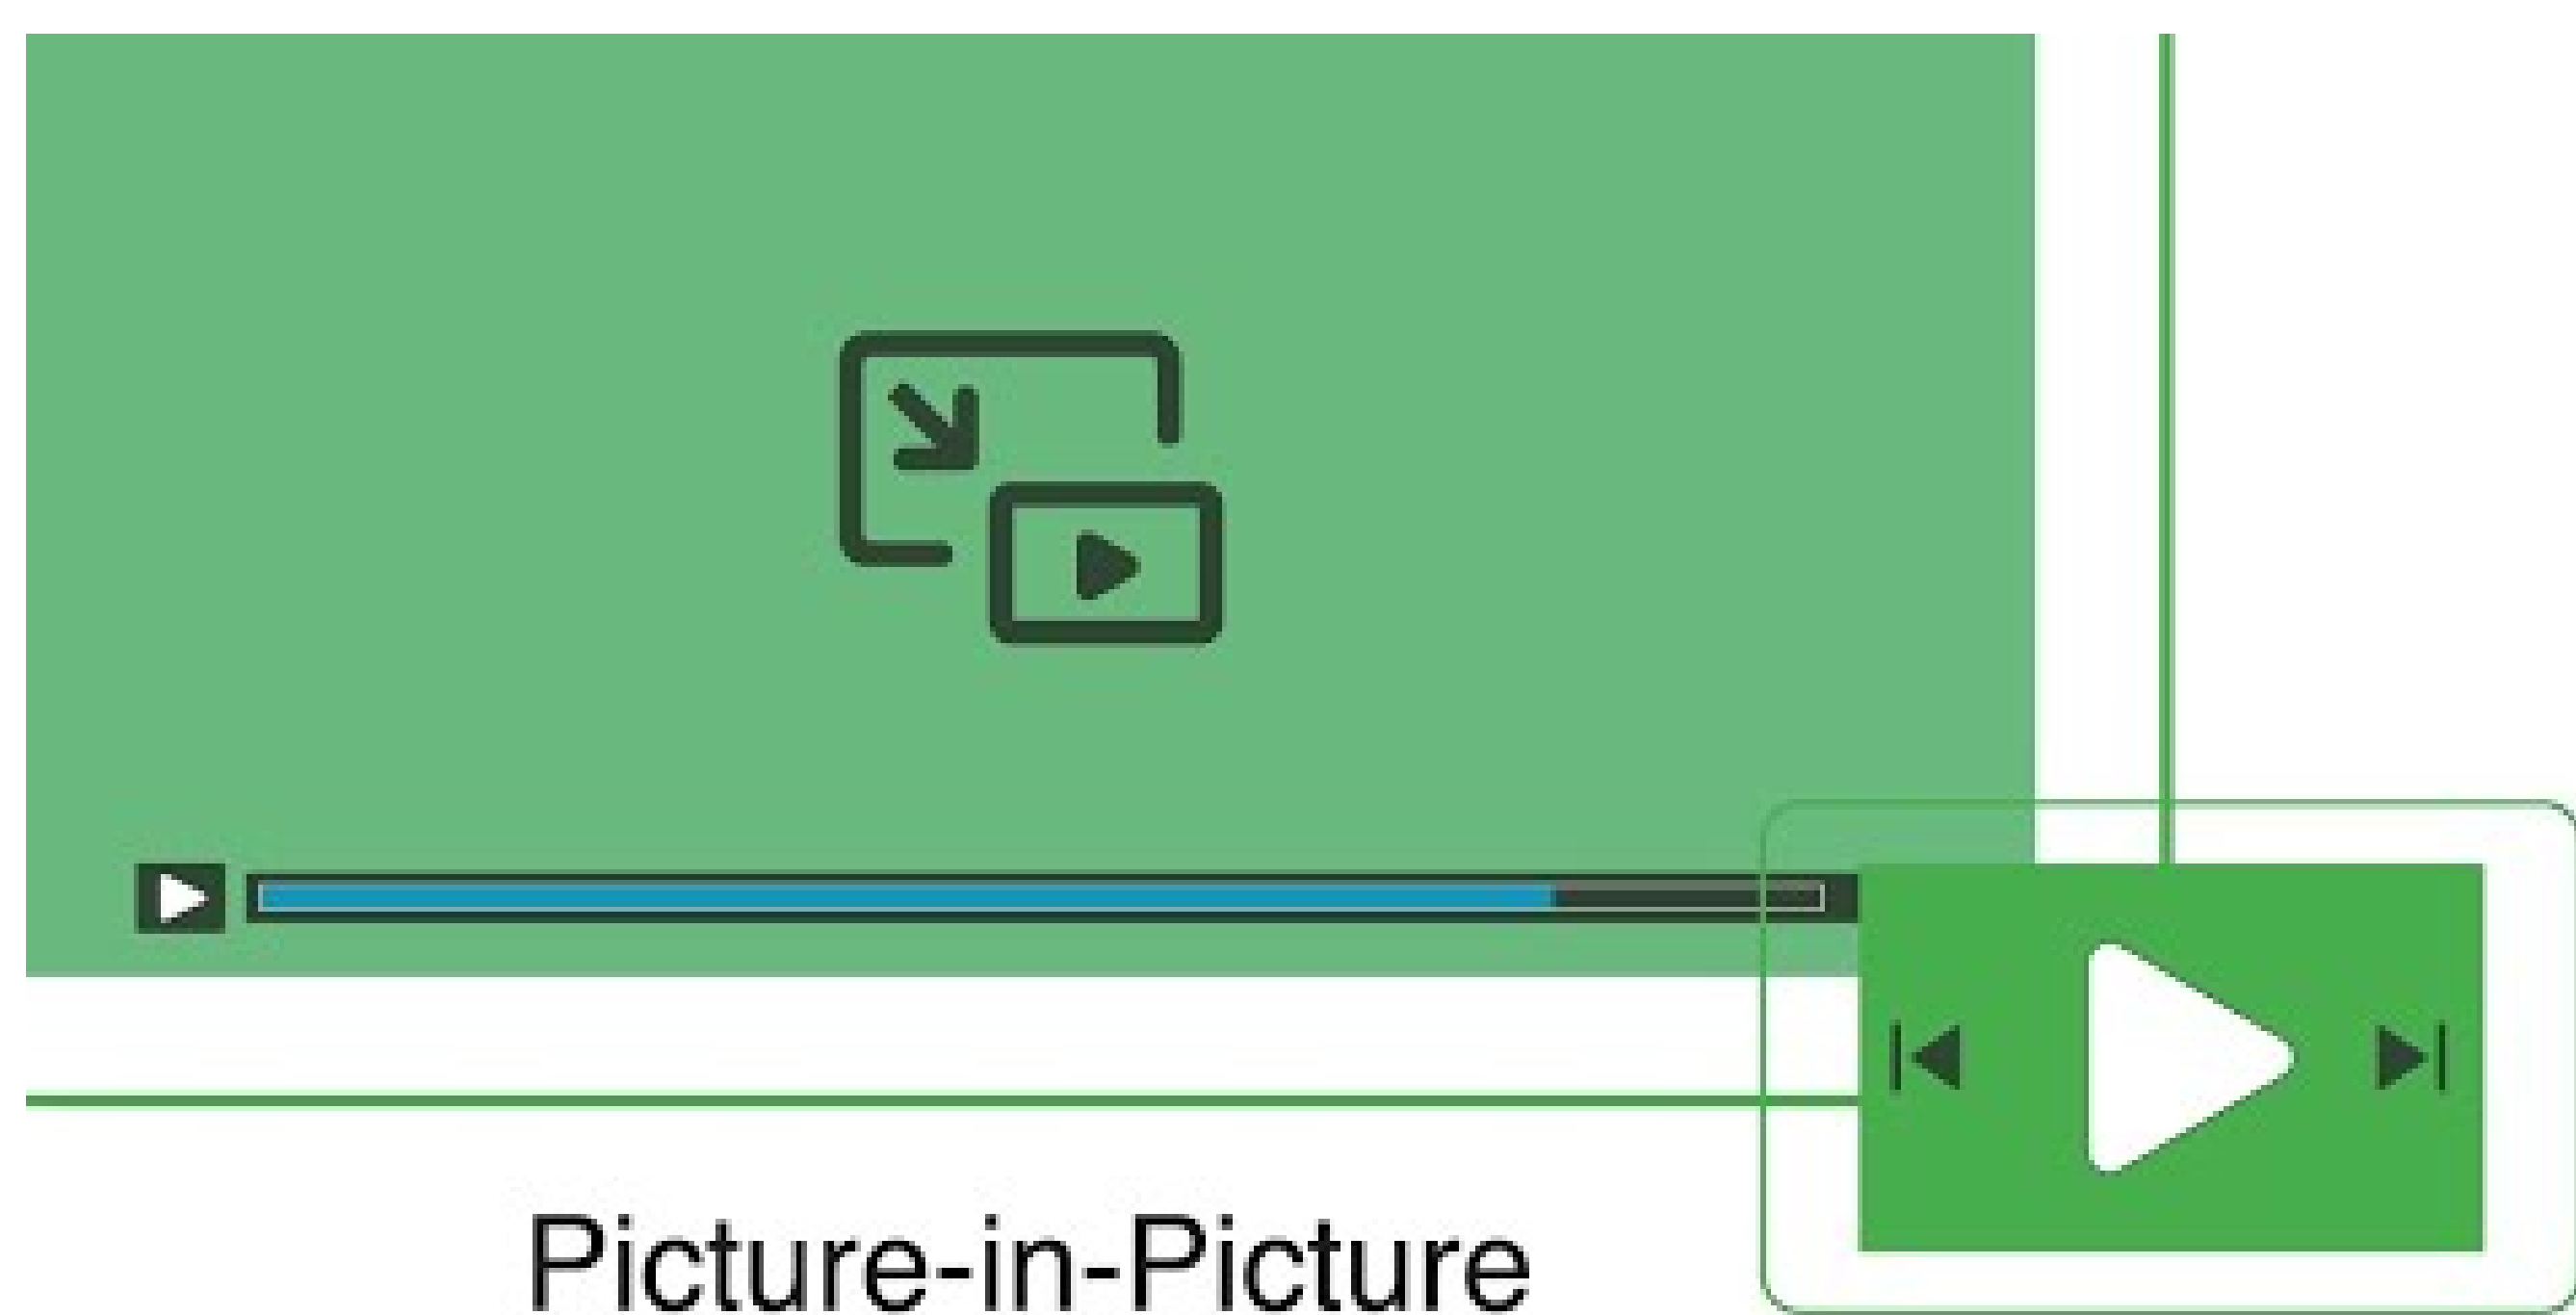

Recommend to students who...

1. want to know the font that they would like to download and use it
2. want to know the font of style, size, and color

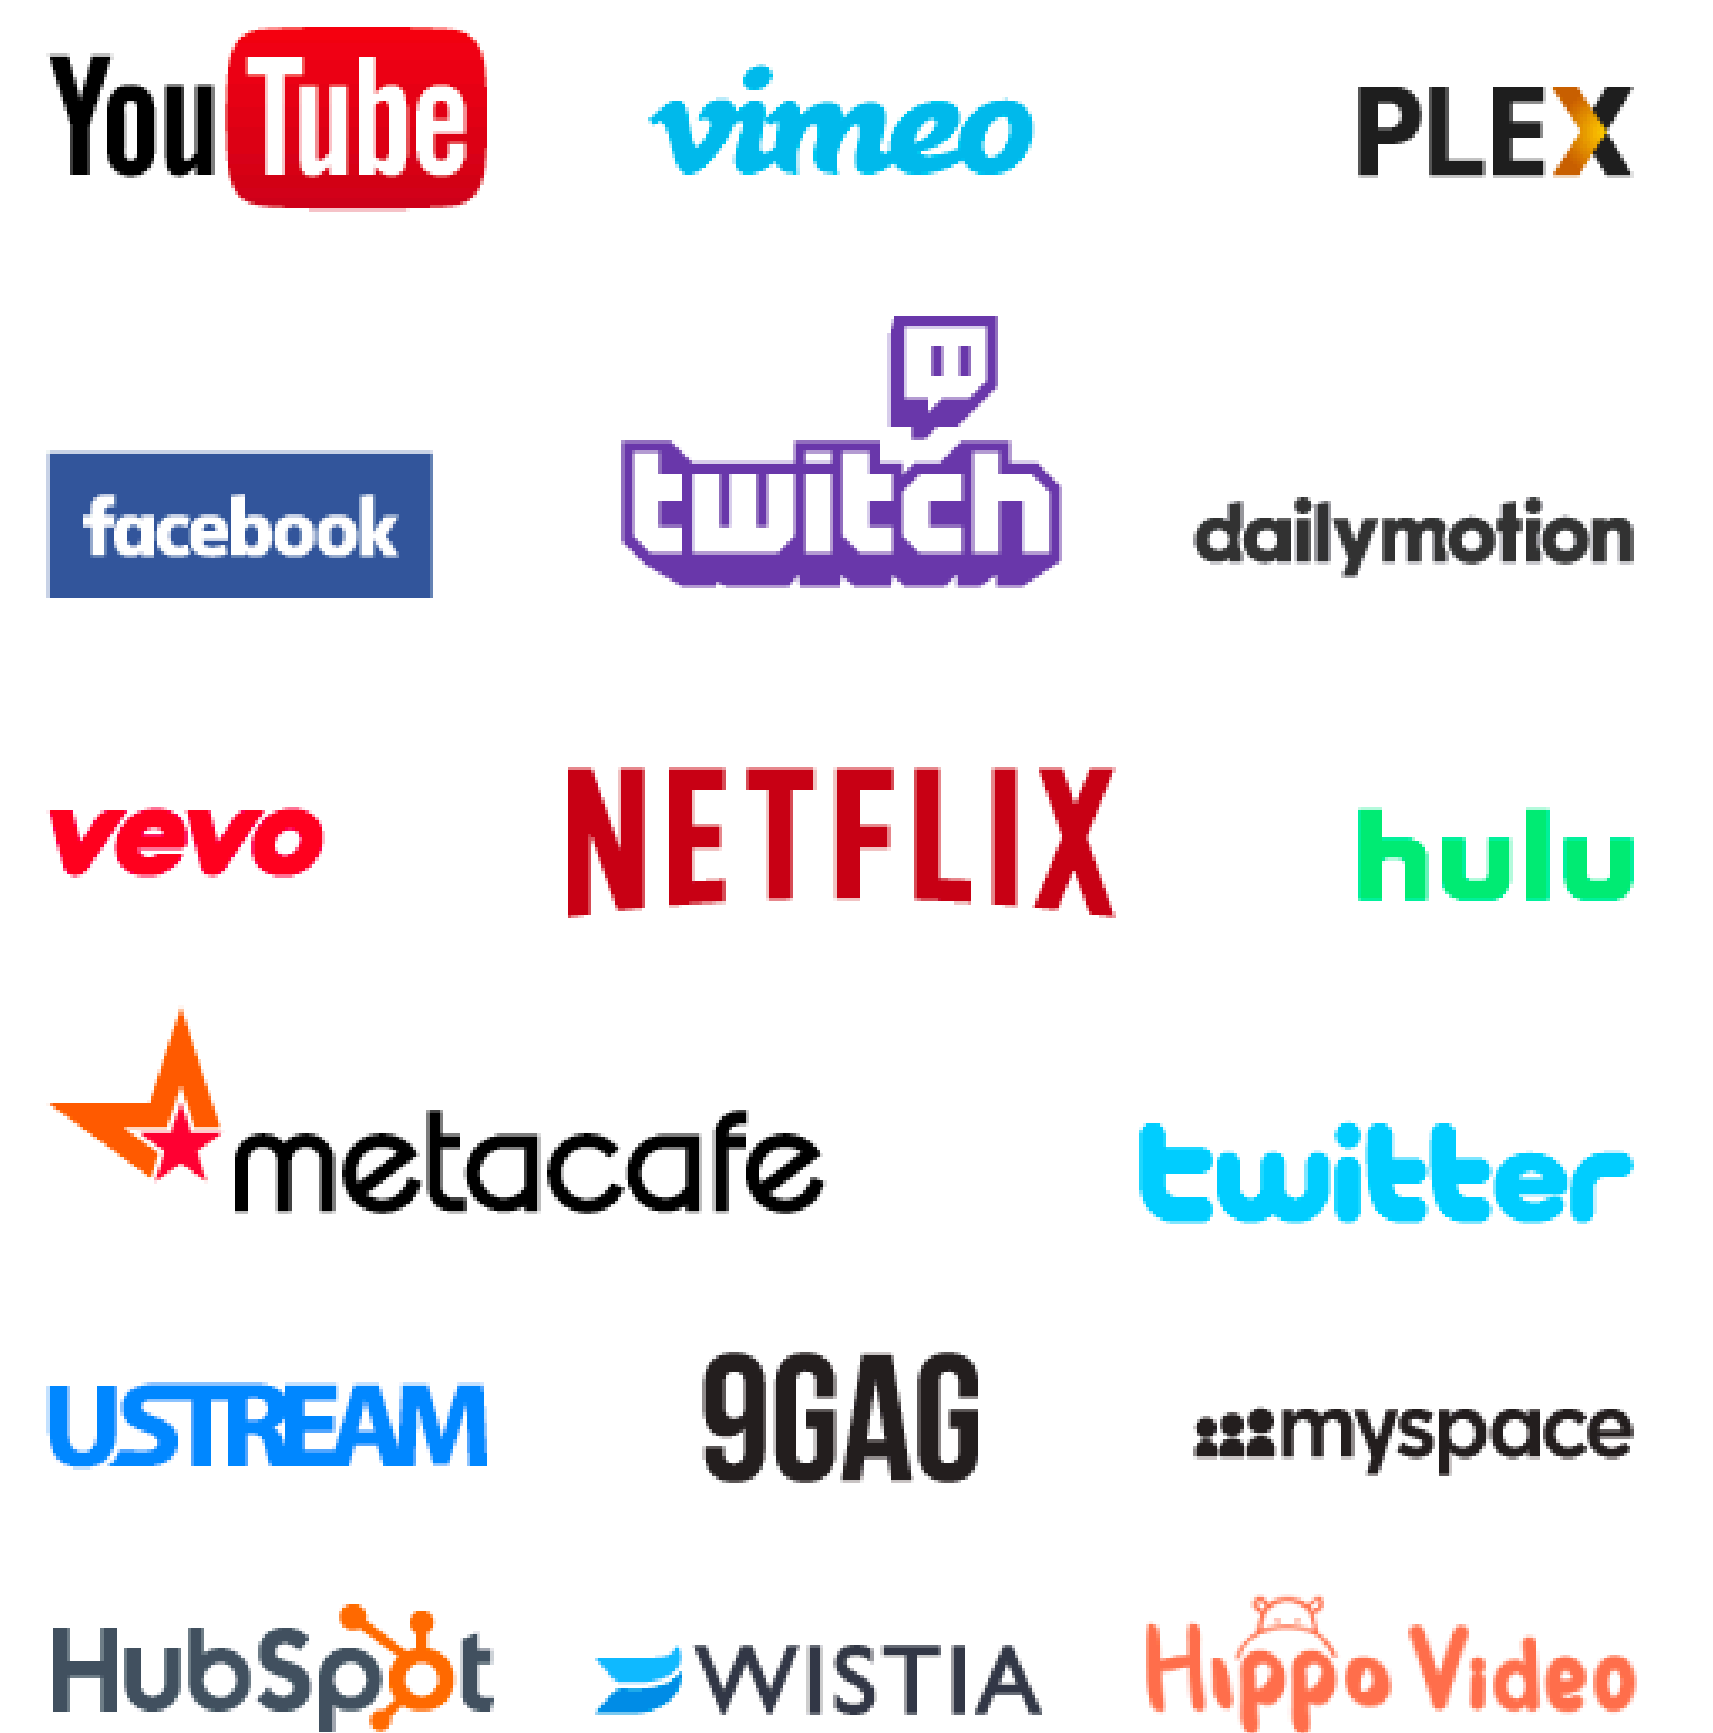

APPS OF THE WEEK

FLOATING PLAYER

Watch videos in a floating window Picture in Picture (PIP) either **outside** the browser window or **overlaying** any other websites!

Streaming sites available:

Recommend to students who...

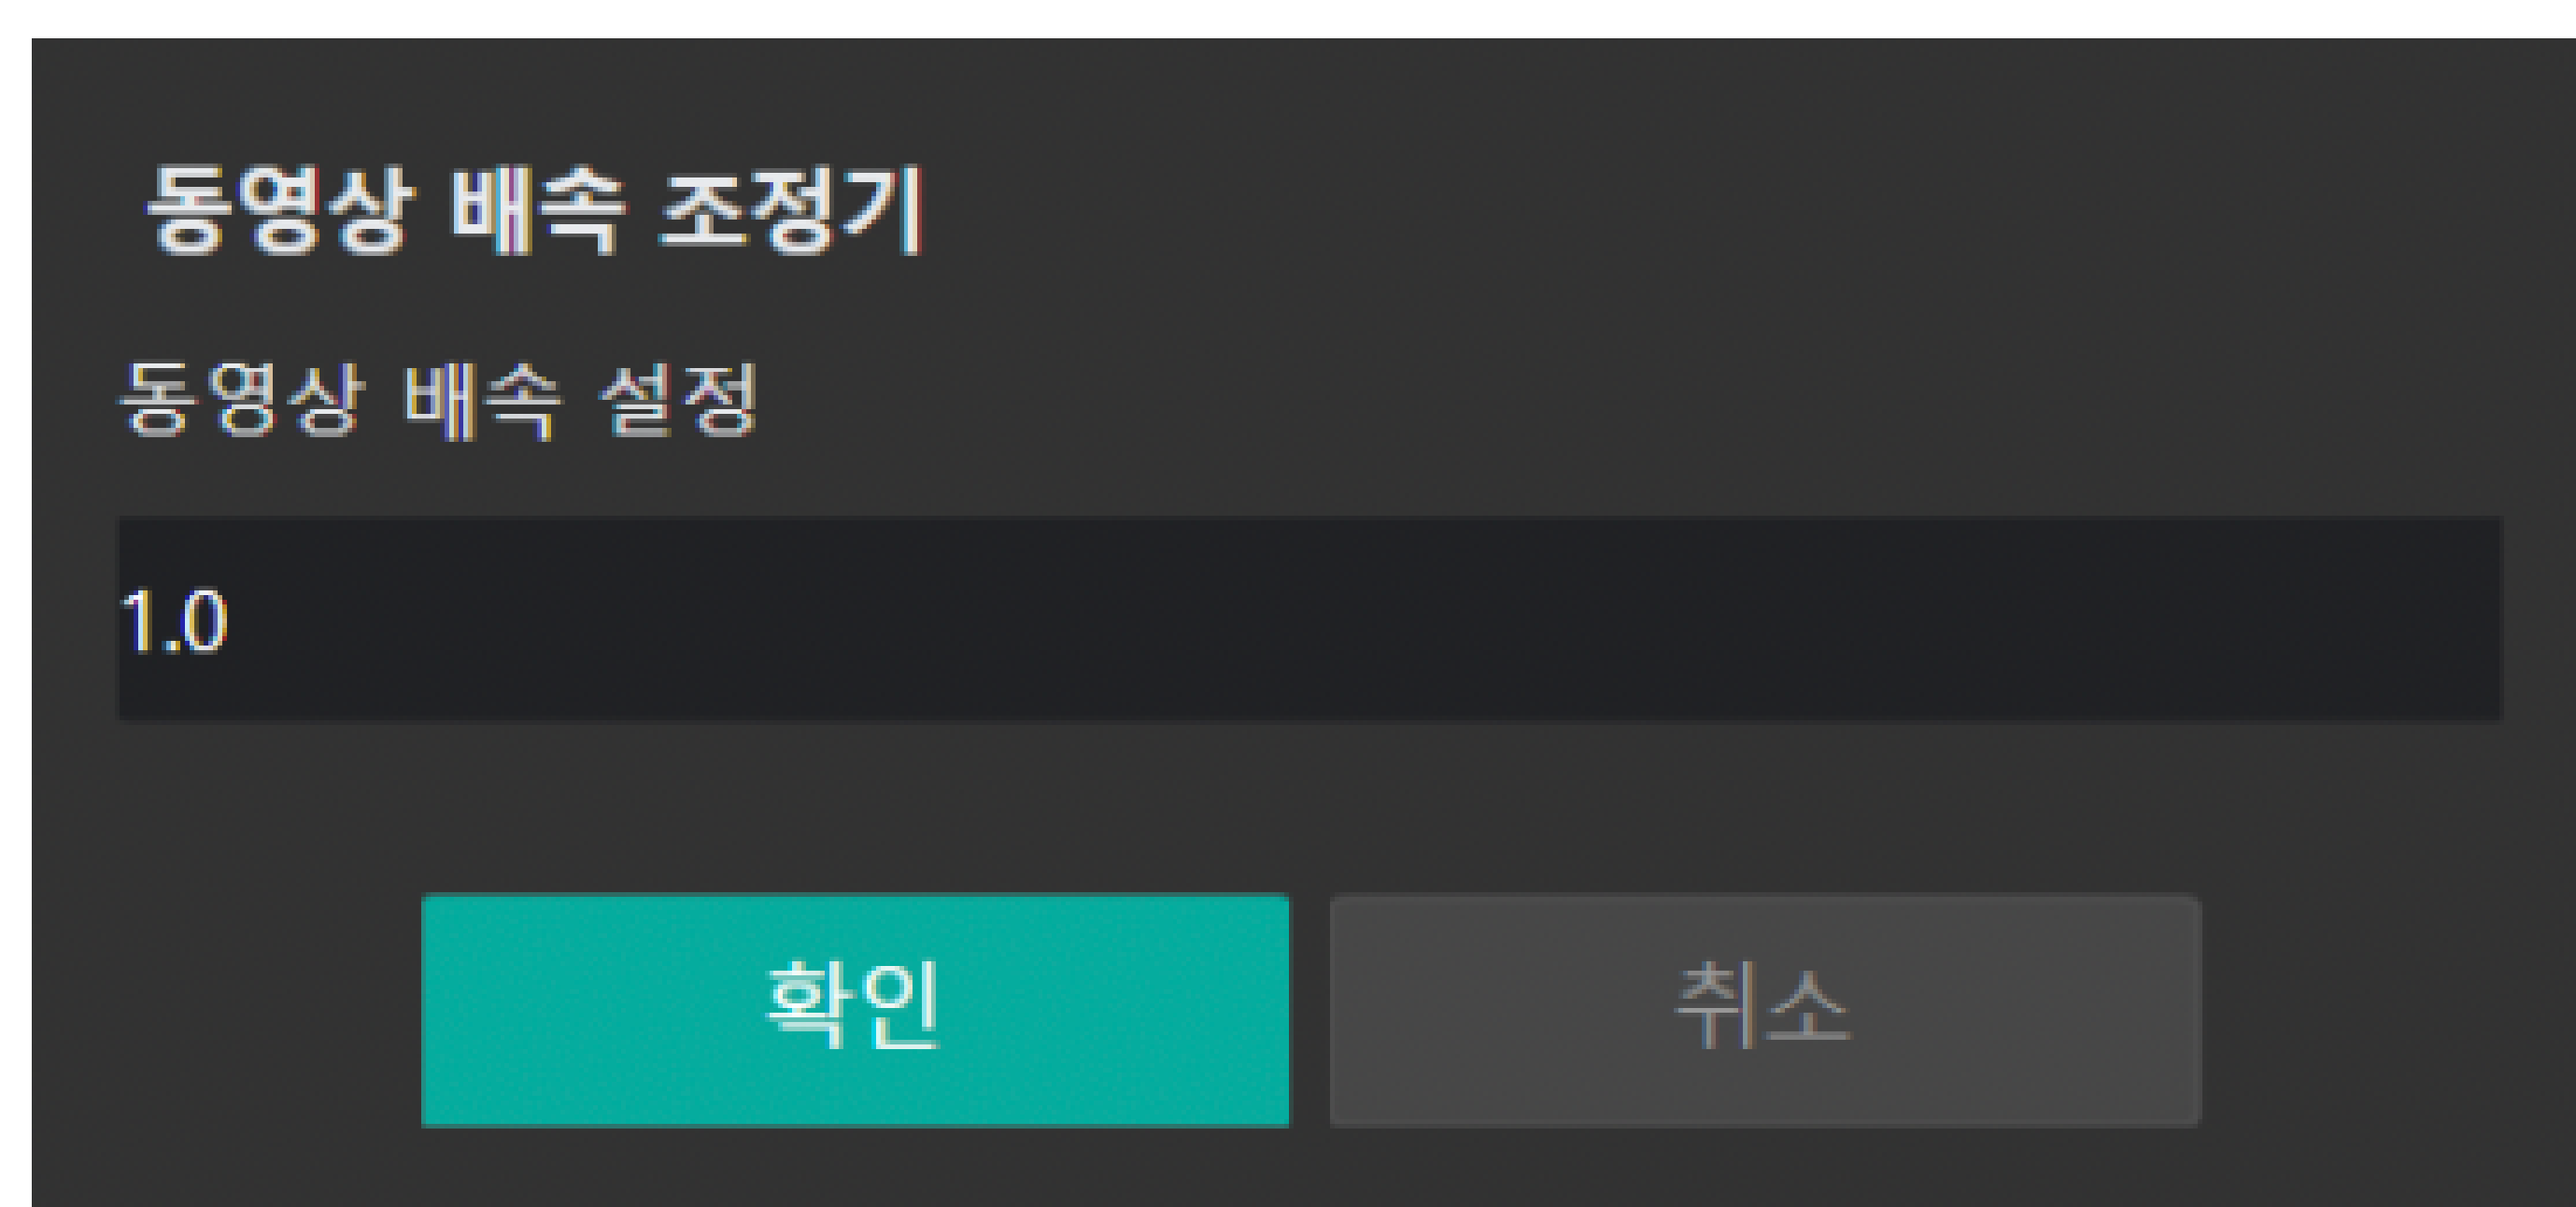

Want to **multitask** while watching favorite content
ex) watching tutorial videos

More Useful Tips!

1. Can keep videos playing in a small, size-adjustable window
2. Download it by adding Floating Player to your chrome extension

VIDEO SPEED CONTROLLER

동영상 배속 재생기

How to use it...

1. Go to the website with the video you want to watch
2. Type the speed of the video you want to watch

(*Can even speed up to x10 and more)

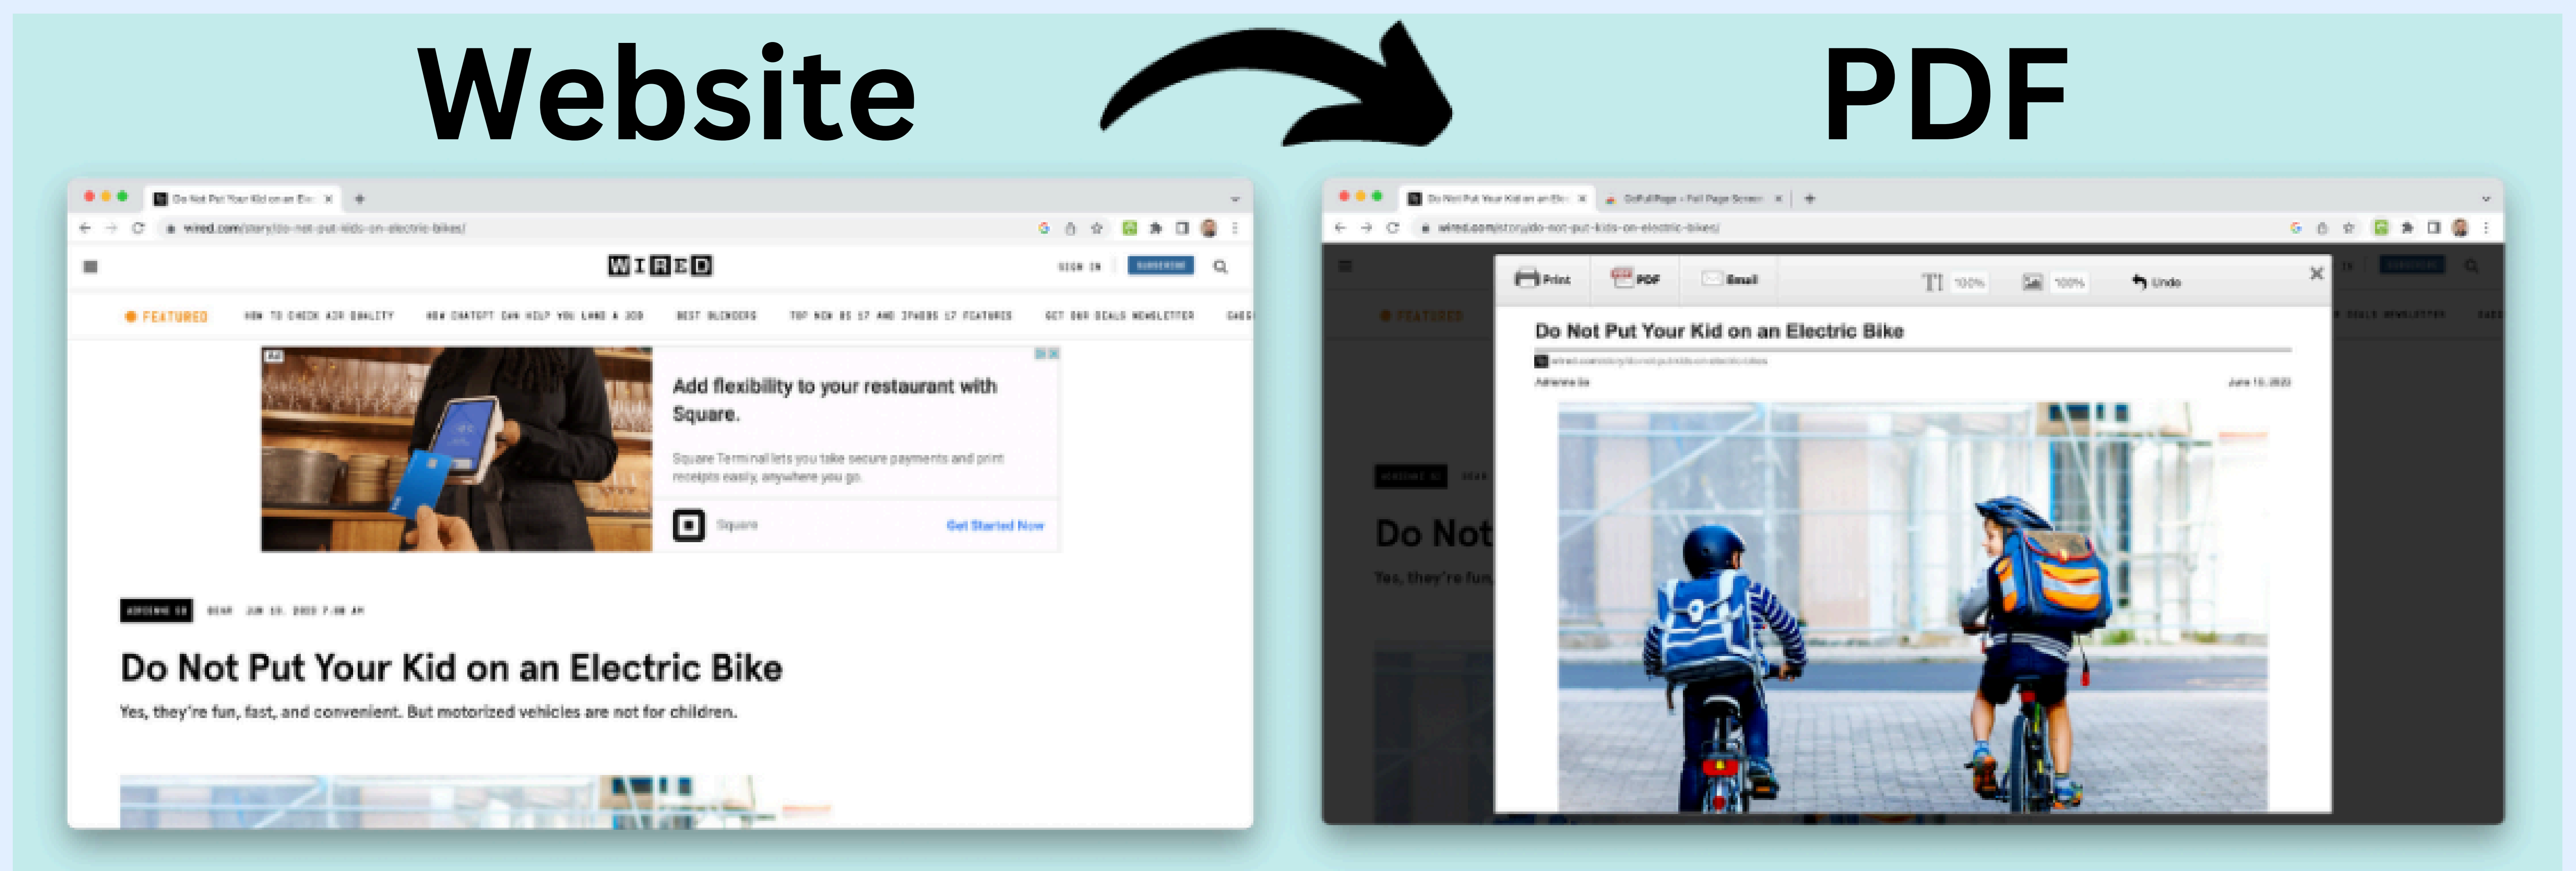

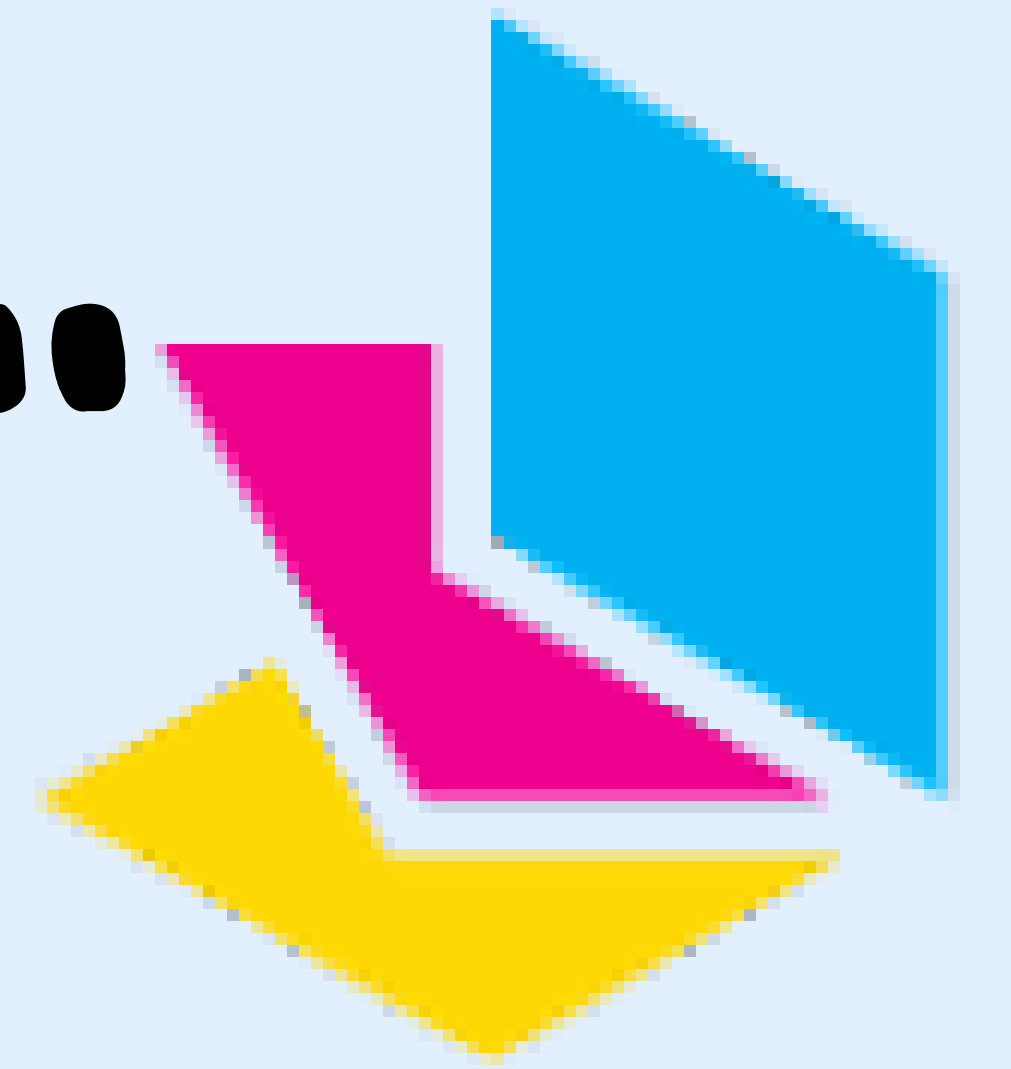

Recommend this to students who...

1. Wants to watch videos at a different speed from the normal speed.
2. Wants to watch videos **faster than X2**.

APP OF THE WEEK

"PRINT FRIENDLY"

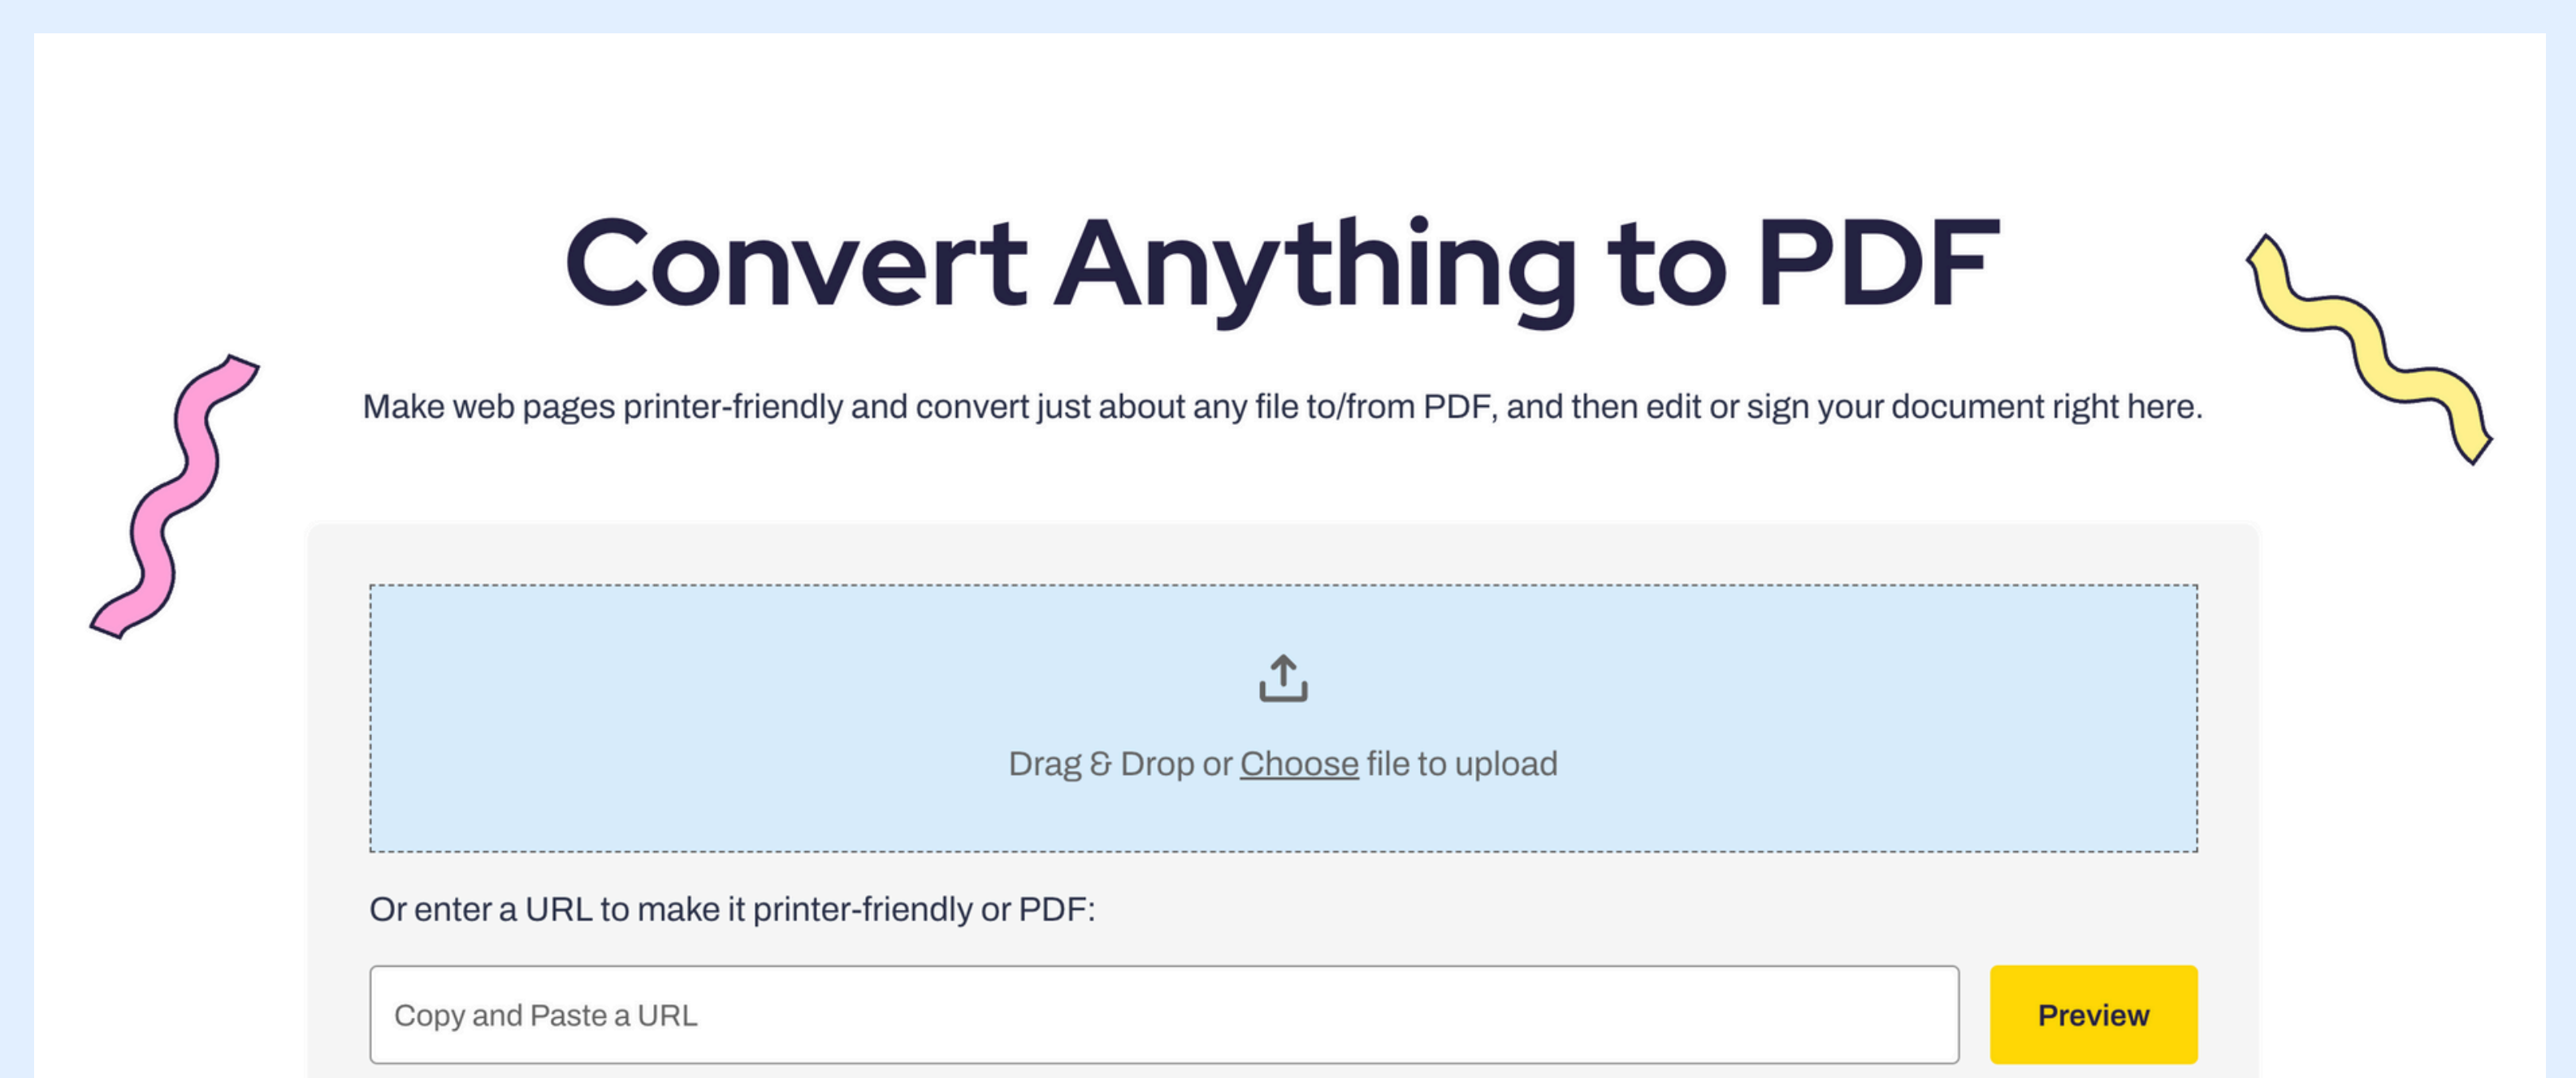

How to use

1. Open Chrome Web Store and add **"Print Friendly"**
2. Open the extension and press **"Print Friendly"**
3. Delete the unnecessary part, and make some edits on the screen
4. Download the edited page in **PDF** or **directly print** it.

Recommend to students who...

- Have trouble **downloading** a pdf version of the file you want to print
- Want to **print the edited version** of website
- Want to **convert** any file to pdf to submit for assessments
- Want to read while leaving notes digitally

There is a PrintFriendly **website** as well. On the website, you can...

- Convert the file into Word, PDF, JPEG, and Excel
- Download pdf version of the webpage

More Useful Tips!

1. You can remove ads and only print out wanted parts
2. You can resize images and texts
3. You can freely re-format the file!
